

# RECALL

An app to help you keep track of who you've met

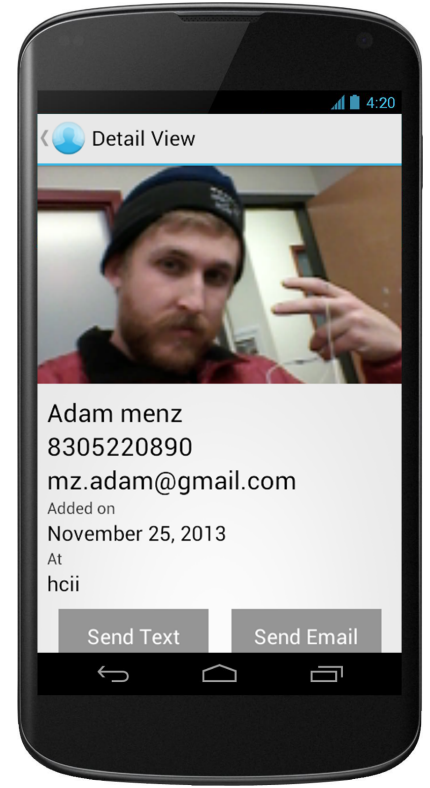

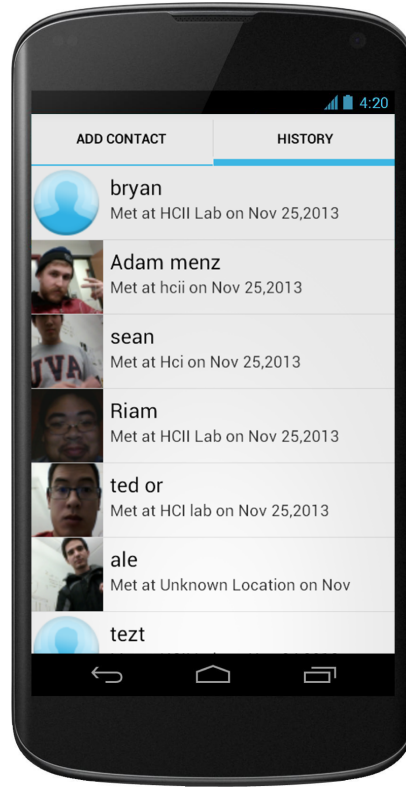

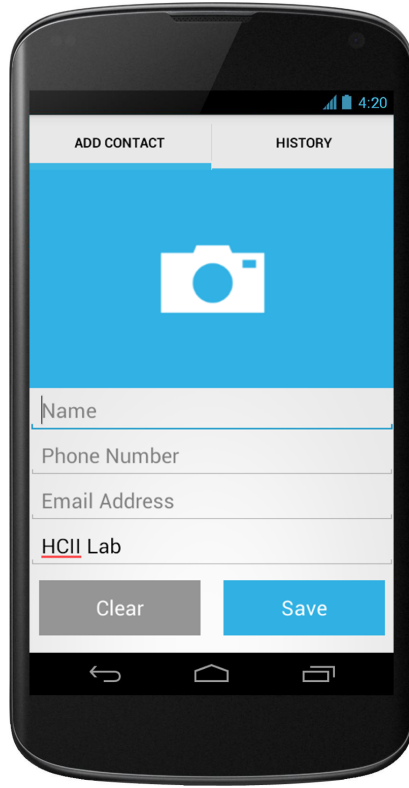

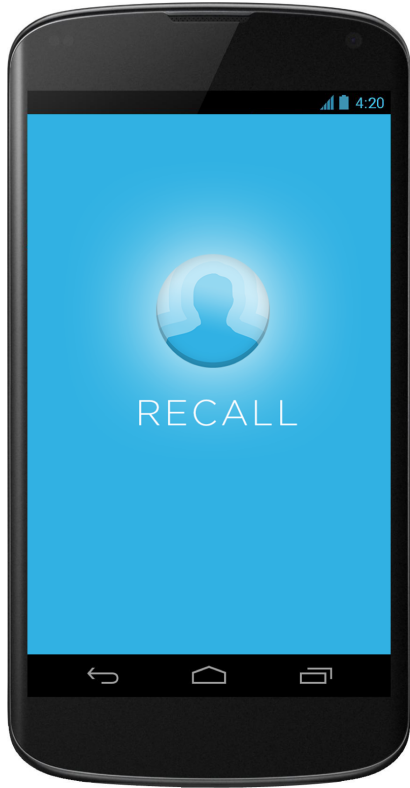

Designed and developed by Andre Le

Have you ever met someone  
but couldn't remember their name?

Recall is a simple app that helps you keep track of who you've met in the past by saving when and where you've met them

# Implementation

- Splash Screen Activity
- Location Services
- Foursquare API
- JSON Parsing
- AutoCompleteTextView
- TabHosts and TabViews
- ListView and Adapters
- Service Providers
- Text Message Intent
- Email Intent
- Camera Intent
- SQLite Database

# Hard

- Google Play Services
- Full-Text Search
- Global Search

# Easy

- Layout
- Text and Email Intents
